

“The RSPBs Assistant Conservation Officer and Green Infrastructure Champion recently met with the Watton Village Smart Communities team. The RSPB was asked if they could provide some general advice on green infrastructure and incorporating wildlife habitat/features into scheme design to feed into the early stages of the plans. The RSPB has advised it is vital the project appoints a suitably qualified Ecologist to undertake an assessment of the site’s value to wildlife and to demonstrate how they intend to protect and enhance this in light of any development plans.”
